Gender	Male/Female
Nationality	Any
Work Experience	Minimum of 5 years of professional experience in Web Development. Full-stack back-end and front end experience. Also possess good communication skills and be able to work in a team.

Background

We are seeking an experienced web developer to join our team. The ideal candidate will have strong expertise in web development using PHP, JavaScript, Bootstrap, JQuery, Node JS and Angular. Additionally, the candidate should be able to develop web applications with Oracle as a database from scratch or using a framework.
The successful candidate will manage the development and maintain our current web applications and also handle new web projects from the users. The ideal candidate should possess robust knowledge of web application technology, good analytical skills, fast learner and have the ability to identify bugs and implement permanent solutions.

The Web Developer will work as a team member and communicate with the ES team and also with users across the organization to align the understanding of application objectives and coordinate with the HOD for guidance and project priorities. If you have a passion for Web Development and eager to expand your skills and knowledge, and are looking for an exciting opportunity to further improve your experience, we encourage you to apply for this position.

Key Responsibilities

- Responsible for maintaining, fixing bugs and developing future enhancements of the current YTY Web Applications.

- Design the blueprint and flow, analyze and develop a new web project.

- Encourage growth through technical innovations and knowledge of web applications and staying up-to-date with the latest trends and best practices.

- Coordinate with the other team members and follow-up with users to execute Web Project, Enhancement or bug fix flawlessly.

- Able to analyze and identify the issue of the application and provide a permanent solution.

Education/Experience/Skills

- A Bachelor's degree in Computer Science or a related field is required, with an advantage for Leadership/Management in Customer Service, Project Management, or Information Security Management/Certification.

- At least 5 years of experience in a senior technical environment focusing on building Web Applications or a similar role.

- Strong experience in Web Development using PHP, JavaScript, Bootstrap and JQuery.

- Able to develop Web Application with Oracle as database from scratch or using framework.

- Technical Competencies.

    1. Web Programming such as PHP, JavaScript, Bootstrap, NodeJS, etc.
    2. Good knowledge in Front-End development like Angular
    3. Good knowledge in Oracle database.
    4. A good foundation in OOP, design pattern and relational database.
    5. Experience in developing adaptive and responsive UI.

- Strong interpersonal skills and the ability to work well in both internal and external teamwork environments.

- Knowledge of mobile development (Android and IOS) would be a plus.
